KEY PROJECTS

Pacesetter Tax

SaaS taxation system serving thousands of users in the United States. Led QA efforts for production system with chat features, task management, appointment scheduling, multiple payment gateway integrations (Stripe, ACH, Authorize.net, Nexio), and QuickBooks integration. Successfully processed 2021 tax season and peaked performance in 2022.

Legal Cadence

SaaS legal case management system for US market. Manages legal cases, upcoming case schedules, case logs, attorney task management, and appointment scheduling. Served as QA lead responsible for planning, testing, and comprehensive documentation.

Speak Tu

Employee report generation system for US organizations creating dynamic reports based on ethnicity, salary, gender, and other demographic factors. Automates annual report generation for government submission including California reports and Pay Equity data reports.

One Globe Nepal

Multi-country travel company website (Bhutan, India, Nepal) featuring ticket booking for inbound/outbound tours and tour package management. Successfully completed Phase 1 with additional development phases ongoing.

TEGW

Online book translation application enabling translation of existing books to different languages and publishing as ebooks. Currently deployed in production environment.

Hotel Grand View

Business portfolio and booking website enabling efficient room availability checking and reservation system. Served as project lead and quality assurance lead. Successfully deployed to production.
